Professional Summary

Computer Science graduate from MTI University with 3+ years of hands-on experience in IT operations, system administration, networking and full-stack development. Experienced in configuring and managing networks (MikroTik), administering Linux and Windows environments, and diagnosing and resolving technical issues for business clients. Backend developer with Laravel, Node.js, MySQL and PostgreSQL, experienced in integrating AI models into web platforms, with a security-first mindset backed by penetration testing training. Seeking an IT Specialist role where I can deliver reliable technical support, maintenance and infrastructure management.

Education

Bachelor of Science in Computer Science — MTI University, Cairo | 2022 – 2026

- Cumulative GPA: 3.2 / 4.0 (80%) — Grade: Very Good
- Graduation Project: [NeoVuo](#), an AI clinical screening platform — Grade A+ | Technical Lead
 - o Designed and built the database, backend and frontend, and led their implementation across the team.
 - o Applied security standards tailored to the clinical environment to protect doctors' and patients' data.
 - o Built the APIs that manage the AI model's parameters and integrated the model with the platform.
 - o Created a dynamic module to monitor and maintain the model from inside the system, with no code changes needed.

Core Competencies

IT Operations Management	System Administration
Technical Support & Troubleshooting	Network Configuration & Management
Hardware & Software Maintenance	Cloud Platform Integration & Deployment

Technical Leadership & Team Mentoring	Project Coordination & Delivery
Process Improvement	Cross-Functional & Remote Team Collaboration

Professional Experience

Backend Developer — MEEM-DTT

- Developed backend services and RESTful APIs with Laravel for the company's internal systems.
- Worked on two major private company projects, implementing business logic, database design and role-based permissions to the project specifications.
- Collaborated with the development team on code reviews, testing and deployment.

IT Manager (Cooperative) — Acceler8, UAE (Remote)

- Managed IT operations and system administration for the company's technical environment.
- Coordinated with cross-functional and remote teams to deliver technical projects and resolve issues.

Full-Stack Web Developer — Freelance / Contract | April 2023 – Present

- Build web applications end to end with PHP (Laravel) and Node.js, backed by MySQL and PostgreSQL databases.
- Built custom CRM and ERP systems from scratch to manage clients' business operations.
- **NeoVuo (Graduation Project):** AI-powered professional clinical screening platform; built the web platform and integrated the AI models with the backend.
- **Synnatrix:** AI-assisted oral cancer screening platform; led the integration between the AI models and the web application.
- Other client work: a hospital licensing system with role-based access control, the boopet.net e-commerce platform (custom WooCommerce PHP), and React dashboards for clinical practices.

Selected Projects

- **Network Management System (X Space):** Deployed a local network management system on MikroTik hardware with Mikhmon, with automated scripts for user generation and bandwidth profiles.
- **Hardware-Integrated Clinical Workflow:** Set up digital workflows for a dental clinic, connecting intraoral scanners and 3D printers with web-based access logs and patient data interfaces.
- **Custom PHP Authentication Module:** Built a standalone authentication and session management module in core PHP, hardened against SQL injection and XSS.
- **Computer Vision AI Pipeline:** Developed and documented an AI pipeline covering dataset preprocessing and hyperparameter tuning, with models hosted on Hugging Face Inference Endpoints.

Technical Skills

- **Operating Systems:** Windows, Linux (Arch / EndeavourOS, Kali Linux)
- **Networking:** MikroTik configuration, Mikhmon, bandwidth management, network security auditing
- **Security:** Ethical hacking, penetration testing (Wifite, Airedodn), vulnerability research, access control
- **Backend:** PHP, Laravel, Node.js, RESTful APIs
- **Frontend:** JavaScript (ES6+), React, Tailwind CSS, HTML5 / CSS3
- **Databases & Architecture:** MySQL, relational database design, MVC
- **Tools:** Git, XAMPP, Hugging Face, Microsoft Office

Training & Courses

- **CCNA (Cisco Certified Network Associate)** — Networking course
- **MCSA (Microsoft Certified Solutions Associate)** — Windows Server administration course
- **Web Full-Stack Development** — Information Technology Institute (ITI), 3-month training program
- **Web Backend Development** — National Telecommunication Institute (NTI)
- **Cybersecurity** — Penetration Testing & Ethical Hacking training

Volunteer & Community Experience

Volunteer — Resala Charity Organization | 2021 – Present

- Take part in community service and charitable activities, building teamwork and communication skills.

Backend Web Team Leader — Creativa Hub

- Led the backend web team, guiding members through project tasks and coding best practices.

Full-Stack Web Team Leader — HubX Community

- Led the full-stack web team, coordinating project work and mentoring members.

Security Team Member (Penetration Testing) — Enactus

- Participated in the security team, carrying out penetration testing activities.
